OFFER BRIEF | UPDATED MAY 2026

Private AI Chief of Staff

A private AI staffer for operators who need fewer dropped balls, faster follow-up, private memory, task routing, receipts, and more capacity without hiring full-time staff.

Pulse AI Studios builds practical AI systems for operators with real work.

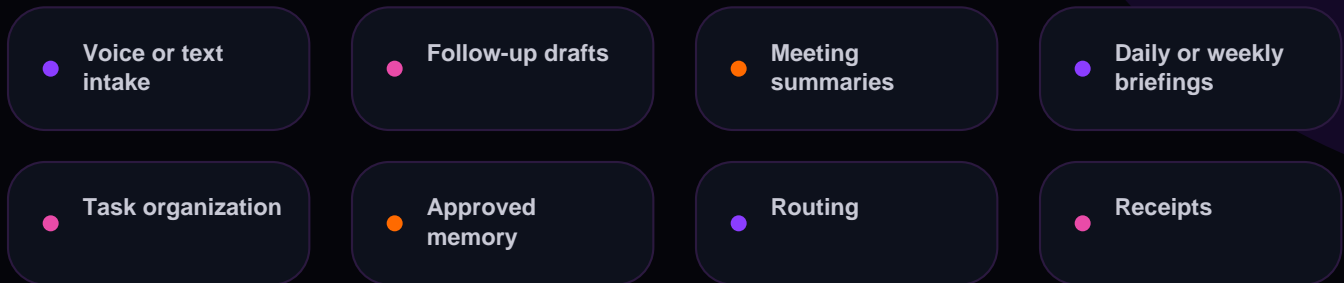

Synthetic host. Transparent AI. Real operators behind the build.

AI SYSTEMS.

CREATIVE
INTELLIGENCE.
BUILT FOR
THE
NEXT ERA OF
INNOVATION.

Not a chatbot. A private operating layer for loose work.

The bottleneck is usually not strategy. It is loose work: follow-ups that sit too long, meeting notes that never become tasks, leads that need faster first response, client prep that happens too late, inbox items that bury priorities, and context trapped in one person's head.

What makes this different

Pulse builds the workflow, memory rules, approval boundaries, output format, handoff, and operating discipline around the AI.

Offer Ladder

Good Fit

Not A Fit

● Founders

● AI with no human approval

● Consultants

● No repeatable workflow

First call question: Where is your week leaking the most value? Inbox, meetings, follow-up, client prep, task tracking, lead response, or content production.

● Small expert teams

● Regulated work without compliance review
